TURA COLLECTION

Tura's stylishly curved contemporary platters and dishes have been designed with the gastronorm footprint. Silicone feet allow for the platters to stay in place when in the counter whilst allowing the products to also be easily stacked whilst not in use.

PLASTICS

MELAMINE

Outperforms traditional ceramic and proven to be 4x stronger. Chip and break resistant, ideal for event caterers. A favourite for waiting staff as look like ceramic but with half the weight.

There is a common misperception that plastics use a large amount of the world's petroleum. Less than 4% of the world's oil production goes to produce all types of plastics. PET accounts for less than 1/2 of 1 percent. Because PET is fully recyclable, it's a highly sustainable material. Every time a PET container is recycled, its petroleum feedstocks can be recaptured and reused.*

POLYSTYRENE (PS)

100% recyclable. Our range of PS products are reusable and not intended for single use. Our most popular platter range for caterers who need a reliable solution. Strong, lightweight, ideal for canapes and outdoor events. Event caterers number one choice of platter.

POLYETHYLENE TEREPHTHALATE (PET)

The perfect material for lids. PET is the most widely recycled plastic in the world. Prized for its strength, thermo-stability, and transparency, PET is a popular choice for packaging. PET is also inexpensive, lightweight, resealable, shatter-resistant and recyclable.
